Relationships®

Innovative Design

Designing homes for today and tomorrow.

Innovative design plays an essential role in every home we build, from everything you see to everything you don't. It starts with thoroughly researching how people live day to day in order to create homes people love, with open floor plans, flexible living spaces, seamless indoor/outdoor living and thoughtful details like extra storage and generous counter space. Our commitment to innovative design also extends to our quality construction techniques and the materials we use, so you can enjoy a healthier, smarter and more comfortable place to call home.

Energy Efficient

Every home we build is designed to be ENERGY STAR® certified. In fact, we go beyond the EPA requirements by ensuring every KB home has been tested and verified by a third-party inspector to meet the EPA's strict certification standards.

Our homes have fewer air leaks and drafts, reduced noise, plus energy-efficient appliances and lighting. Not only does a new KB home help save the planet, it also helps save you money on utility bills compared to used homes. As an industry leader in energy efficiency, we provide an Energy Savings Comparison to demonstrate the lower monthly cost of homeownership possible with a KB home.

Water Conservation

Each KB home is built with water-saving features like WaterSense faucets, toilets and showerheads to reduce usage and help save money. Dishwashers are ENERGY STAR certified and use significantly less water than standard models. You can find additional water-saving features and appliances at the KB Home Design Studio.

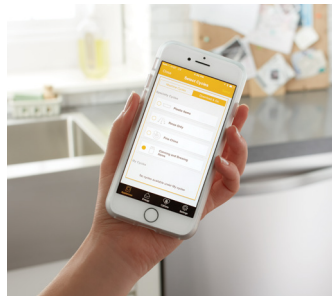

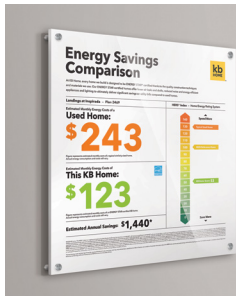

Healthy Home

Our homes are designed to deliver an enhanced indoor air environment and include a high performance ventilation system that regularly introduces fresh outdoor air. We also use low- or zero-VOC products in insulation, paint, carpeting and cabinetry. And we build with quality construction techniques and features guided by the EPA's Indoor airPLUS standards.

Smart Systems

As the world becomes more focused on smart technology, so do our homes. We partner with trusted brands and offer smart products through our Design Studio that maximize energy and water performance, optimize connectivity and offer greater personal efficiency. Products include the Whirlpool® line of Smart Appliances, Kwikset® SmartKey™ locks, ecobee3 lite Smart Thermostats, and USB outlets that 'shut down' when you're done charging.
